

Interview For Selection Of Field Investigator

ADVERTISEMENT NO. CMFRI /FRAEED/ 08/2023

ICAR- CMFRI is currently implementing a research project on " The changing dynamics of labour migration on employment, livelihoods and resource productivity patterns in Indian marine fisheries sector", under the theme of Social Sciences and Policy in Agriculture funded by ICAR-NASF. The project attempts to understand the labour migration pattern in the marine fisheries sector and its subsequent consequences. Assessing the labour demand-supply scenario, understanding the labour migration process, the factors leading /responsible for migration, exploring the impact of labour migration on livelihoods and labour productivity in marine fisheries sector are the major objectives of the project. The study lays emphasis on reasoning why people move to fisheries even with lack of skills, and its impact on the dynamics of traditional fishers and the fishing environment. With growing concerns of widening demand and supply gap due to non-availability of skilled labour, migration could be unavoidable in ensuring fishing operations as well as gainful employment to the fishers. Thus, the project would promote to generate a database of the labour migrants and to develop policy plans for the benefit of the sector.

Eligible candidates are invited for interview at this Institute for the temporary position in the following project in this Institute purely on contract basis up to May 2026.

Name of Project : The changing dynamics of labour migration on employment, livelihoods and resource productivity patterns in Indian marine fisheries sector.
